Labor Against Police Terror

May Day celebrates uniting the struggles of workers and all oppressed people fighting for justice

Rally and march with Oakland's Longshoremen as they stop work and shut down the Port of Oakland against police killings!

The labor force has played an integral part in social justice movements throughout United States history and beyond. ILWU Local 10 in particular, has been at the forefront of many monumental events including, but not imited to the Big Strike of 1934, the 1984 Anti-Apartheid action against South Africa, and the 2010 Oscar Grant rally and port shut down.

Police terrorism in the United States is out of control. We have witnessed an endless onslaught of police brutality and police killings of innocent and unarmed people. These assaults have been mainly directed towards the Black community. We as union and non-union workers alike cannot standby and become desensitized to these great injustices.
